6. H. Incanus - Southern swamps - similar to Moscheutos - pale yellow, pink or white blooms crimson eye.
7. H. Surratensis) Himalyan types. Not listed
   H. Pungens) in U.S.A. Cannot describe
   H. Fragrans) them till mine bloom.

III Annuals

1. H. Tritonum - Flower of an hour. 2' high, divided leaves, sulphur hellow blooms, dark centers (known as H. Africanus)
2. H. Esculenta (Okra) - Edible pods.
3. H. Sabdariffa - (Rosette or Jamaca Sorrel). Immature calyces used in making acid jellies, in drinks as substitute for cranberries.
4. H. Manihot - Large yellow blooms with dark brown centers - 8 to 9' high.
5. H. Abelmoschus - Musk Mallow - 6' tall. Lobed leaves, yellow blooms, crimson centers.

IV Hardy Shrubs

1. H. Syriacus - Native of Syria - (Althea Frutex) Also known as Shrub Althea, Rose of Sharon.

V Hybrid - Listed by Riegel Plant Co. (Experiment Ga.) as Mutabilis being a cross between Althea and H. Moscheutos

VI Hollyhock (Listed variously as Annual, Perennial, Biennial and Hardy Annual depending on location)

Althea Rosea - (Common)

Althea Ficifolia - Lobed deeply in leaves.

Note: In my judgement the above classification does not completely cover the species but to my knowledge is reasonably complete.

The best Christmas cigar I received was the one that burnt the hole in my Christmas tie.

HIBISCUS CARE FOR THE WINTER IN SOUTH FLORIDA

Right now in October, fertilize your Hibiscus with 2-8-10. In locations which are frost free you can use 4-8-8. Do not cut your Hibiscus during the Winter months. Do Not fertilize until Spring. A spray of Isotox, chlordane & Aramite every 3 months will be sufficient. They are compatible to mix together. If your Hibiscus do not look good mix your spray with one tablespoon of Hyponex. Be sure to remember to water your Hibiscus well before spraying or fertilizing at least 3 to 8 hours before.

Hope you win lots of top awards next season.
